PRIMARY EXAMINER

REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:
 - a. As regards the invention recited in independent claims 1, 19, 34 and 45, the combinations recited in the claims are novel and unobvious. Of particular interest is the structure recited in the claims directed to the deflectors on the outside walls of differing heights and angles for splitting the secondary fuel. Naturally the allowability of the limitation in and of itself is not at issue. Nevertheless, in combination with the remainder of the elements recited in the claim, the claimed subject matter is allowable.
 - b. The prior art of record does not anticipate, nor make obvious, the claimed invention, alone or in combination therewith. The prior art submitted by applicants, namely McGill and Schwartz, disclose low Nox gas burners for use with a furnace, but fail to anticipate the specifically recited structure and method of the instant application. Jones, cited by the examiner, discloses primary and secondary fuel, as well as the outer wall and a deflector 45. Nevertheless, the deflector of Jones does not provide the claimed structure of the deflector of the instant application nor the function thereof. Maughan, cited by the examiner, discloses an arrangement including baffles and deflectors for separating gas flow. Nevertheless, the arrangement disclosed by Maughan neither anticipates nor makes obvious the presently claimed invention, and is nonanalogous.
- Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
